- **Cloud Computing:** Microsoft Azure & Oracle Cloud fundamentals (in progress)
- **Tools:** Jupyter Notebook, VS Code, Git, GitHub, Microsoft Excel, Word

PROJECTS

Telco Customer Churn Analysis | Python · Pandas · Matplotlib · Seaborn · EDA — [GitHub](#)

- Analyzed 7,043 customer records across 21 features to identify customer segments and factors associated with telecom churn.
- Performed data cleaning including blank TotalCharges handling, data-type conversion, duplicate checks, and categorical/numerical exploration.
- Identified a 26.54% overall churn rate and analyzed churn patterns across tenure, contracts, services, demographics, and payment methods.
- Found higher churn among month-to-month contracts, short-tenure customers, customers without Online Security/Tech Support, and electronic-check users.

BlinkIT Sales Intelligence Dashboard | Power BI · Data Cleaning · Business Intelligence — [GitHub](#)

- Developed an interactive Power BI dashboard to analyze grocery sales performance, product categories, outlet characteristics, and business KPIs.
- Performed data preparation and transformation to create business-ready analytical views.
- Designed KPI-driven visualizations covering total sales, average sales, item count, outlet performance, and product-category performance.
- Used dashboard storytelling to support sales monitoring, inventory planning, product analysis, and outlet strategy.

E-commerce Sales Analytics Dashboard | Power BI · Data Visualization · KPI Design — [GitHub](#)

- Built an interactive BI dashboard for sales, revenue, orders, products, customers, regions, and time-based trends.
- Developed KPI views for total revenue, orders, quantity sold, average order value, product performance, and regional performance.
- Performed data transformation and visualization to identify high-performing products, categories, customer segments, and geographic trends.
